Rajesh N

PRINCIPAL FULL-STACK ENGINEER | BLOCKCHAIN & WEB3 | AI-ASSISTED DEVELOPMENT

Santa Clara, CA • (408) 806-7394 • navrajesh@gmail.com

LinkedIn: linkedin.com/in/rajesh-nkrishnan • **Portfolio:** rajeshn.vercel.app

PROFESSIONAL SUMMARY

- Hands-on engineering lead with 20+ years of experience designing and delivering enterprise web applications, full-stack platforms, REST APIs, and cloud-connected solutions using React, Next.js, Angular, TypeScript, and Node.js.
- 4+ years of professional blockchain, Web3, and real-world asset (RWA) tokenization experience at LifeSite/TokenX, developing Solidity smart contracts, enterprise wallet integrations, and Web2-to-Web3 solutions.
- Built AURA, a multi-tenant SaaS platform for patient reactivation, featuring Next.js 15 customer/admin portals, PostgreSQL, Drizzle ORM, Clerk authentication, and tenant isolation.
- Experienced in AI-assisted software development using Claude Code, OpenAI Codex, and Cursor, with hands-on ownership of architecture, implementation, debugging, code review, and delivery.

TECHNICAL SKILLS

Blockchain, Web3 & Tokenization

Solidity, RWA Tokenization, Ethereum, Polygon, EVM, ERC-20, ERC-721, ERC-1155, ERC-3643 (PoC), Hardhat, OpenZeppelin, Ethers.js

Frontend & Full-Stack Development

React, Next.js 15, Angular, TypeScript, JavaScript, HTML5, CSS3, Backbone.js, Ext JS

Backend & API Development

Node.js, REST APIs, authentication/authorization, microservices, C#, classic ASP.NET

SaaS Platforms & Databases

PostgreSQL, SQL Server, MongoDB, Drizzle ORM, Clerk, multi-tenancy, Git, Salesforce AppExchange, Amazon Alexa

AI-Assisted Engineering

Claude Code, OpenAI Codex, Cursor, ChatGPT, AI tool calling, MCP

PROFESSIONAL EXPERIENCE

Engineering Lead – Blockchain & Web3 | Jan 2022 – Present

LifeSite Inc. / TokenX • *Mount***ai**n View, CA

- Built user-facing workflows, dashboards, **Node.js/TypeScript REST APIs**, backend services, and integrations connecting enterprise applications to **EVM** blockch**ai**n networks.
- Implemented **Solidity ERC-721**, **ERC-1155**, and **ERC-20** smart contracts for **authentication**, provenance, notary, and loyalty use cases; supported minting, transfers, metadata, and transaction workflows.
- Designed custodial wallet infrastructure and secure Web2-to-Web3 API integrations; developed permissioned real-world asset (RWA) tokenization proof-of-concept workflows for token issuance, transfers, and redemption using **ERC-3643** concepts.
- Contributed hands-on code, architecture decisions, reviews, debugging, and engineering mentorship.

Engineering Lead – Full Stack & Platform | Jan 2018 – Jan 2022

LifeSite Inc. / LifeSite Vault • *Mount***ai**n View, CA

- Rearchitected a legacy **Backbone.js** single-page application and migrated frontend components, dashboards, and workflows to **Angular**.
- Developed **Node.js REST** services, **authentication**, and cloud integrations for secure web/mobile data-management applications.
- Delivered integrations published through **Salesforce AppExchange** and **Amazon Alexa**; worked across product, design, and distributed engineering teams.

Full-Stack Developer – AURA Patient Reactivation OS

Independent SaaS Project | Recent

- Built a multi-tenant patient reactivation **SaaS** with **Next.js 15**, **React**, **TypeScript**, and separate customer/admin portals.
- Implemented **PostgreSQL** data models with **Drizzle ORM**, **row-level security (RLS)**, and **Clerk** authentication to support tenant isolation.

EARLIER EXPERIENCE

Principal Engineer

Dell SonicWall | Santa Clara, CA | Aug 2015 – Nov 2017

- Led architecture and development of a legacy firewall administration system in **Ext JS**, improving UI/UX, robustness, and scalability.

Freelance Full-Stack Consultant

Various Clients | Bay Area, CA | May 2004 – Jun 2014

- Delivered frontend and full-stack applications for Microsoft, Cisco, Intuit, Western Digital, and UCSF, including dashboards, CRM integrations, and platform migrations.

Key Engagements:

- **Western Digital** — Built an MVC application for cluster storage virtualization with **Ext JS** dashboards.
- **UCSF** — Developed a faculty management dashboard using **Backbone.js** and **Highcharts**.
- **Microsoft** — Integrated ORMMA-standard advertising into Hotmail.com using **JSONP**.
- **Intuit** — Migrated CRM applications to classic **ASP.NET**; contributed to mobile PoCs and A/B testing.
- **Cisco** — Developed media-sharing functionality for Flip camcorders with YouTube/Flash integration.

Web Developer

Intuit Inc. | Mountain View, CA | Jan 2003 – Apr 2004

- Improved e-commerce experiences for IntuitMarket users and redesigned checks and forms customization workflows.

Software Engineer

Commerce One Inc. | Cupertino, CA | Jun 2000 – Jan 2003

- Developed real-time auction dashboards and sourcing applications using classic **ASP.NET/C#** and Java-based frameworks.

EDUCATION

Bachelor of Engineering — Annamal**ai** University, India
