Professional Summary

Blockchain Engineering Lead | RWA Tokenization | Smart Contracts | Web3 Architecture

- Engineering leader with 20+ years of software development experience and 8+ years of hands-on blockchain specialization, focused on **real-world asset (RWA) tokenization**, smart contract development, and **Web2-to-Web3** integration on EVM-compatible chains.
- Architected and shipped production-grade smart contract systems (**ERC-721, ERC-1155, ERC-20**) on Ethereum, Polygon, Arbitrum, and Optimism for enterprise B2B clients across authentication, supply chain provenance, loyalty rewards, and notary use cases, with deep working knowledge of the **ERC-3643 (T-REX)** security-token standard.
- Deep expertise in Solidity, Hardhat, OpenZeppelin, and custodial wallet infrastructure.
- AI-augmented development workflow — **Claude Code** and **OpenAI Codex** for contract development and refactoring, **Claude Design** for rapid dApp prototyping — used to accelerate delivery cycles.
- Proven track record leading and mentoring cross-functional engineering teams to deliver scalable decentralized platforms using Agile methodologies.
- Actively seeking Web3 engineering or technical leadership roles in RWA tokenization and institutional blockchain platforms.

Technical Skills

Smart Contract Development

Solidity, OpenZeppelin, Hardhat, Foundry, Truffle, Remix IDE, Ethers.js, Web3.js

EVM Chains & Layer 2 Networks

Ethereum, Polygon, Arbitrum, Optimism, EVM-compatible chains, Layer 2 scaling

Token Standards & RWA

ERC-20, ERC-721, ERC-1155, ERC-1400, ERC-3643, ERC-4626, Real-World Asset (RWA) Tokenization, Security Tokens, NFT metadata, IPFS

Web3 Infrastructure & Security

Smart contract auditing, Gas optimization, Multi-sig (Gnosis Safe), Custodial wallet architecture, Web2-to-Web3 API integration, MetaMask, DeFi protocols

AI-Augmented Engineering

Claude Code, OpenAI Codex, Claude Design

Languages & Frameworks

JavaScript, TypeScript, Node.js, C#, ASP.NET, Angular, Backbone.js, Ext JS

Backend & Databases

RESTful APIs, SOAP, MongoDB, SQL Server, ADO.NET

Cloud & DevOps

AWS, Azure, Git, SVN, Docker, JIRA, Rally

Integrations & Platforms

Salesforce Lightning (AppExchange), Amazon Alexa (IoT/Voice), HTML5, CSS3, Bootstrap, jQuery

Methodologies

Agile, Scrum, Lean Startup

Professional Experience

Engineering Lead – Web3, Blockchain & RWA Tokenization

LifeSite Inc. (TokenX) | Mountain View, CA | Jan 2018 – Present

Web3 / Blockchain (TokenX Platform)

- Spearheaded end-to-end architecture and delivery of **TokenX NFT**, a production-grade real-world asset (**RWA**) **tokenization** platform deployed on **Ethereum, Polygon, Arbitrum**, and **Optimism Layer 2** networks, enabling enterprise **B2B** clients to tokenize physical and digital assets.
- Designed and deployed **ERC-721** and **ERC-1155 smart contracts** in **Solidity** using **OpenZeppelin, Hardhat**, and **Truffle**, supporting high-value use cases including digital authentication, notary services, supply chain provenance (whiskey), and loyalty rewards programs.
- Building RWA tokenization capabilities on the **ERC-3643 (T-REX)** permissioned **security-token** standard, extending the platform toward compliant, institutional-grade asset issuance.
- Architected a **custodial wallet** solution tailored for enterprise onboarding, abstracting blockchain complexity for **B2B** clients with no prior Web3 experience — reducing client integration time significantly.
- Built RESTful Web2-to-Web3 API bridges using Node.js and TypeScript, enabling legacy enterprise applications to interact seamlessly with decentralized smart contract infrastructure.
- Applied gas optimization techniques across deployed contracts to minimize transaction costs on Ethereum mainnet and maximize L2 efficiency on Polygon and Arbitrum.
- Accelerated development and testing cycles through an **AI-augmented workflow** — **Claude Code** and **OpenAI Codex** for contract development and refactoring, **Claude Design** for rapid **dApp** prototyping.
- Mentored and upskilled engineers on smart contract development, Solidity security patterns, dApp architecture, and decentralized ecosystem concepts.

Live Products: <https://www.tokenx.is> | <https://www.tokenx.dev/demos>

Web2 / Platform Engineering (LifeSite Vault)

- Led global engineering teams to design and deliver LifeSite Vault, a secure personal data storage and collaboration platform across web and mobile (iOS/Android).
- Integrated voice-enabled features via Amazon Alexa (published on Alexa App Store) and delivered CRM capabilities via a Salesforce AppExchange app.
- Delivered scalable, secure architecture using Agile and Lean Startup methodologies across distributed teams.

Principal Engineer

Dell SonicWall | Santa Clara, CA | Aug 2015 – Nov 2017

- Led the architecture and development of a legacy firewall admin system in ExtJS for improving UI/UX, system robustness and scalability.
- Collaborated with cross-functional teams to enhance firewall technologies, data visualization, search, and threat management systems.

Freelance Full-Stack Consultant

Various Clients | Bay Area, CA | May 2004 – Jun 2014

Delivered front-end and full-stack solutions for Fortune 500 clients including Microsoft, Cisco, Intuit, Western Digital, and UCSF. Projects spanned data visualization, dashboard development, CRM integrations, UI frameworks, and system migration across web and mobile platforms.

Key Engagements:

- **Western Digital** — Built MVC application for cluster storage virtualization with Ext JS dashboards
- **UCSF** — Developed faculty management dashboard using Backbone.js and Highcharts
- **Microsoft** — Integrated ORMMA-standard ads in Hotmail.com via JSONP
- **Intuit** — Migrated CRM applications to ASP.NET, led mobile POCs and A/B testing
- **Cisco** — Developed media sharing platform for Flip camcorders with YouTube/Flash integration

Web Developer

Intuit Inc. | Mountain View, CA | Jan 2003 – Apr 2004

- Improved e-commerce experience for IntuitMarket users.
- Led redesign of checks and forms customization flows.

Software Engineer

Commerce One Inc. | Cupertino, CA | Jun 2000 – Jan 2003

- Developed real-time auction dashboards and sourcing platforms using ASP.NET and Struts.
- Led SDLC activities including architecture, development, and release management.

Education

Bachelor of Engineering

Annamalai University, India

Blockchain Portfolio
